

## Oral Health Care Recommendations for <Animal>

The VOHC (Veterinary Oral Health Council) is an organization that provides an objective means of recognizing commercially available products that meet pre-set standards of effectiveness in controlling the accumulation of plaque and calculus in dogs and cats. The next page lists products that have been awarded the VOHC Seal of Acceptance. For more information see [www.vohc.org](http://www.vohc.org).

- Cat:ESSENTIAL healthymouth Anti-plaque Gel
- Cat:ESSENTIAL healthymouth Anti-plaque Oral Spray
- Cat:ESSENTIAL healthymouth Gel and Brush Combination

Remember that **there is no perfect chew toy for your pet**. Supervision should be provided whenever your pet is given chew toys. A good rule to follow is that dogs should never chew on anything harder than their teeth. Nylon bones, natural bones, pig ears and cow hooves may lead to fractured teeth. Alternatively, Kong toys are firm rubber toys that are compressible and provide good chewing activity for your dog.
